# INSERT INTO

**VIA**: https://docs.oracle.com/cd/B19306_01/server.102/b14200/statements_9014.htm

Use the INSERT statement to add rows to a table, the base table of a view, a partition of a partitioned table or a subpartition of a composite-partitioned table, or an object table or the base table of an object view.

**USO**: INSERT INTO , , ...) VALUES (, , ...);

Este comando SQL nos permitirá añadir una nueva fila o registro a la tabla <TABLE>.
